

MANAGE / WOOCOMMERCE

Planning a store launch

Practical ideas for your next client conversation.

Better projects.

Stronger partnerships.

01 / Start with the outcome

Ask the client what success looks like. Capture the audience, business priorities, and constraints in a shared brief before recommending a solution.

02 / Make the workflow repeatable

Choose a pilot project for WooCommerce. Agree who owns each step and keep the first deliverable small enough to review together.

03 / Learn from the first project

Capture the questions that remain and one improvement to try next. Turn those notes into a reusable starting point for your next client.
