

MANAGE / WOOCOMMERCE

Keeping a busy store running smoothly

The challenge

An illustrative agency team was repeating the same discovery work on every project. Client expectations and internal handoffs were inconsistent.

The approach

The team documented a shared WooCommerce workflow, created a reusable brief, and introduced a weekly review with the client.

What changed

Every project had a named owner, a clear next step, and a shared definition of done. The team spent less time clarifying responsibilities.

Try it with your team

Choose the handoff that creates the most confusion. Draft one template, test it on a project, and review it together.
