

LEARN / AUTOMATTIC FOR AGENCIES

Telling the story of a successful project

Start with the business problem

“What is getting in the way of the results you want from your website today?”

Connect the solution

Explore how Automattic for Agencies fits the client's workflow. Reflect their priorities back before proposing a next step.

When the client asks: Why change now?

Compare the friction in the current process with the effort of making a change. Offer a focused pilot instead of an all-or-nothing commitment.

Close with a clear next step

“Would a working session with your team help us decide whether this is a fit?”
